

ECOZIM Wine Enzymes

Statement re Chloramphenicol

Date of issue 02 Sep. 21

To whom it may concern:

CRCBIOTEK SRL produces and sells a range of ECOZIM® enzyme products for utilization in the wine industry.

We,

CRCBIOTEK SRL
Località Ponte Giulio snc
05018 Orvieto (TR)
Italy

herewith declare that all products of the ECOZIM® range of Wine Enzymes:

- are being produced in accordance with the national food legislation and comply with the JECFA (Joint Expert Committee of FAO and WHO) specifications and with the Food Chemicals Codex recommended specifications for food grade enzymes and may contain stabilizers and preservatives at permitted levels.
- are issued through manufacturing processes during which no inhibitory substances or antibiotics neither are foreseen, nor have been used.
- are made from raw materials that come from suppliers of which none, either related to the above products, or for any other item we source, are being involved with this issue.

We can therefore also confirm and assure that all products of the ECOZIM® range of enzymes are free from Chloramphenicol.

The product should be handled according to the best practices, for instance, such as indicated in the Technical Data Sheet and the Material Safety Data Sheet.
